## Unit 6 Careers in IT

Picture 6.1

### **Learning Outcomes:**

By the end of the lesson, the students are expected to be able to use appropriate English to:

- identify and explain kinds of careers in IT, their job descriptions, and responsibilities.
- describe a dream job.

webmaster

**Exercise 1:** With your group, list IT jobs you know. What do people in these jobs do?

| List of IT Jobs           | Responsibility                                                  |
|---------------------------|-----------------------------------------------------------------|
| Web designers/web masters | Create and maintain web pages and web applications for websites |
|                           |                                                                 |
|                           |                                                                 |
|                           |                                                                 |
|                           |                                                                 |
|                           |                                                                 |

**Exercise 2:** Complete these definitions with jobs from the box.

computer security specialist

software engineer

DTP operator hardware engineer

A \_\_\_\_\_\_\_ designs and develops IT devices.
 A \_\_\_\_\_\_\_ writes computer programs.
 A \_\_\_\_\_\_ edits and deletes posts made by contributors to a blog.
 A \_\_\_\_\_\_ espage layout software to prepare electronic files for publication.
 A \_\_\_\_\_\_ manages the hardware and software that comprise a network.
 A \_\_\_\_\_ designs and maintain websites.
 A \_\_\_\_\_ works with companies to build secure computer systems.
 A \_\_\_\_\_ helps end-users with their computer problems in person by email or over the phone.

network administrator

**Exercise 3**: Read this team introduction. Complete the descriptions 1-4 in Column A with the IT jobs in column B.

Hi, I'm Sylvia. I create usernames and passwords and I set passwords and I set firewalls. This is Isabelle. Her job is to plan and design the network. And this is Andrew. His job is to make sure all the computers work properly. Finally, Mark and Latika. Their area is data processing. We all work for the university. Our office are in Building B.

# Column A Column B 1. Sylvia is a \_\_\_\_\_\_. 2. Isabelle is a \_\_\_\_\_. 3. Andrew is a \_\_\_\_\_. Column B a. database analyst b. IT support officer c. network administrator d. Mark and Latika are \_\_\_\_\_. d. network architect

**Exercise 4**: Listen to this dialog and choose the correct answer.

Kathryn : Karim, what do you do?

Karim : I am a (1) website developer/network administrator. Who do you work

for?

Kathryn : I work for CISCO. I'm a (2) system analyst/website analyst there. Where

are you from Karim?

Karim : I'm from Kuwait. I work for Microsoft there. And where are you from,

Kathryn?

Kathryn : I'm from (3) the *UK/US* but now I live in Qatar. Do you know where

Glenda's from?

Karim : She's from the US.

Kathryn : And what's her job?

Karim : She works for (4) *IBM/Dell*. Her job is to set up new systems.

**Exercise 5**: Listen to six people introducing themselves. Guess what jobs do they do?

| 1. | Maria is a   | a. | database administrator |
|----|--------------|----|------------------------|
| 2. | Ahmed is a   | b. | systems analyst        |
| 3. | Freddy is a  | c. | helpdesk supervisor    |
| 4. | Hana is a    | d. | project manager        |
| 5. | Timothy is a | e. | support technician     |
| 6. | Sophie is a  | f. | software developer     |

**Exercise 6:** Listen to three people talking about their jobs. Complete these job responsibilities.

| Name   | Job      | Responsibilities              |
|--------|----------|-------------------------------|
| Karl   | Software | Designs andcomputer games.    |
| Heba   | Analyst  | computer problems.            |
| Wojtek | Database | Analyses and electronic data. |

**Exercise 7**: Listen the conversation between Ahmed, Betty, and Milo. Fill in the blank to complete the dialogue.

| ,                                                                                   | Ahmed                                            | :   | Where you work, Betty?                                       |  |  |
|-------------------------------------------------------------------------------------|--------------------------------------------------|-----|--------------------------------------------------------------|--|--|
|                                                                                     | Betty                                            | :   | I work for Dell, Dubai. What you?                            |  |  |
|                                                                                     | Ahmed                                            | :   | I for HP in Budapest. What do you, Milo?                     |  |  |
|                                                                                     | Milo                                             | :   | I'm a developer. I work Microsoft in Prague.                 |  |  |
|                                                                                     | Betty                                            | :   | Milo, do you Frida?                                          |  |  |
|                                                                                     | Milo                                             | :   | Yes, I do. What do you to know?                              |  |  |
|                                                                                     | Betty                                            | :   | Where she work?                                              |  |  |
|                                                                                     | Milo                                             | :   | She works with in Prague. She designs websites for           |  |  |
|                                                                                     |                                                  |     | ·                                                            |  |  |
|                                                                                     | Ahmed                                            | :   | I see. Right, let's go. The workshop starts in five minutes. |  |  |
|                                                                                     |                                                  |     |                                                              |  |  |
| Exercise 8: Listen to an IT employee telling his new manager about his job. What do |                                                  |     |                                                              |  |  |
| you think his job is? Tick ✓ the things that usually happen.                        |                                                  |     |                                                              |  |  |
|                                                                                     |                                                  |     |                                                              |  |  |
| 1.                                                                                  | □ Robe                                           | ert | checks emails.                                               |  |  |
| 2.                                                                                  | . □ Robert has emails waiting for him.           |     |                                                              |  |  |
| 2                                                                                   |                                                  |     |                                                              |  |  |
| 3.                                                                                  | . $\square$ Robert visits people at their desks. |     |                                                              |  |  |
| 4.                                                                                  | .   □ Sales people have problems.                |     |                                                              |  |  |
| 5.                                                                                  | .   Robert attends meetings.                     |     |                                                              |  |  |
| 6.                                                                                  | . □ Robert visits other companies.               |     |                                                              |  |  |
|                                                                                     |                                                  |     |                                                              |  |  |

**Exercise 9**: Read the following text about *Industry Overview on IT Career* and answer the following questions.

#### **Industry Overview on IT Careers**

When considering a career in Information Technology, you will soon realize that there are many career options and good jobs available. You will also discover that IT careers offer the flexibility to work in a variety of different industries. Just look around and you can see how much we rely on this technology every day. Then imagine being part of this exciting, growing, and fast-changing industry.

Today's IT plays a critical role in the work of all major industries as well as being a distinct industry on its own. The Information Technology Association of America (ITAA) reports that 92% of all IT workers are in non-IT companies, 80% of which are small companies. Even if the career you choose does not focus solely on IT, the job will likely involve the use of computers and technology to accomplish tasks and process information.

Students interested in becoming IT computer repair technicians or computer support specialists generally can get started with specialized training, an appropriate industry-skill certification, and/or an Associate degree in a computer-related field, plus hands-on experience with computers. Those aspiring to become computer programmers, network engineers, or database administrators usually should plan on at least 4-years of specialized college training.

Technical and professional certifications are also increasing in popularity and importance. IT workers are expected to continually update their knowledge and acquire new skills to remain qualified. In preparing for these credentials, community and technical colleges now play a central role in training new workers, in upgrading the skills of incumbent workers, and in preparing individuals transferring from other occupations.

Individuals interested in an IT career should possess curiosity, have the ability to think logically, and have strong problem-solving skills. A working knowledge of mathematics and good communication skills are also important since troubleshooting, teamwork, and helping others are vital aspects of most of IT jobs. In addition, Web designers and developers also need imaginative and artistic skills. Whether dealing with customers, managers, or other computer specialists, IT professionals need the abilities to solve technical challenges as well as to communicate effectively on paper, in-person, and electronically.

Right now - there are many high-skilled, interesting, and good-paying job opportunities in IT. In fact, America continues to suffer from a shortage of qualified IT workers with flexible and portable skills who can readily adapt and respond to ever-changing IT workplace demands and processes.

From entry-level technicians to computer scientists to chief information officers, there are limitless career possibilities in today's Information Technology. Why not explore how one of these opportunities might benefit you?

### **Questions:**

- 1. What is the general idea of the above article?
- 2. What role does IT play in today?
- 3. How can students start to become a computer technician?
- 4. Why should IT workers upgrade their knowledge and skills?
- 5. What is/are needed by an individual to enroll in the IT career?

Exercise 10: There are ways in describing what are required for particular jobs. You can use modals like *need to, have to, must,* and *be + essential, critical*. Study the following examples.

| Functions                                     | Examples                                        |
|-----------------------------------------------|-------------------------------------------------|
| Note how we describe requirements for         | 1. You need to be able to empathize with        |
| particular jobs.                              | the person at the other end of the              |
|                                               | phone.                                          |
|                                               | 2. IT managers have to take responsibility      |
|                                               | for budgets.                                    |
|                                               | 3. You <i>must</i> be interested in your        |
|                                               | subject.                                        |
|                                               | 4. You <i>must have</i> worked for at least two |
|                                               | years in systems analysis.                      |
|                                               | 5. Experience with mainframes is                |
|                                               | essential/critical.                             |
| We can also treat <i>need</i> as a modal verb | 6. You needn't have a degree in                 |
| and use the negative form needn't.            | computing science.                              |
| We can describe things which are not          | 7. You don't need to have a degree in           |
| requirements like this.                       | computing science.                              |
| Have to is an ordinary verb. Its negative     | 8. You don't have to be an expert in            |
| form is made in the usual way.                | everything.                                     |

Mustn't means it is important not to do something. It is used for warnings, rules and strong advice.

9. You *mustn't* make unauthorized copies of software.

Exercise 11: Fill in the blanks with the appropriate form of the verbs, need to, have to and must, to make sensible statements. More than one answer is possible in some examples.
1. Technical qualifications \_\_\_\_\_\_ to be renewed at intervals to ensure they do not go out of date.
2. You \_\_\_\_\_\_ become an expert in too narrow a field.
3. You \_\_\_\_\_\_ to have good communication skills to become an IT Manager.
4. You \_\_\_\_\_\_ be an expert in hardware to become a programmer.
5. You \_\_\_\_\_\_ have worked with IBM mainframes for at least two years.

You \_\_\_\_\_ have a degree but it \_\_\_\_\_ be in computing science.

**Exercise 12**: Make an essay about your dream job by answering these questions:

1. What is your dream job? Why do you want it?

You \_\_\_\_\_ be able to show leadership.

You \_\_\_\_\_ to have experience in JavaScript.

6.

7.

8.

9.

10.

2. What are the responsibilities for the job?

You to use C++.

These days you \_\_\_\_\_\_ BASIC.

- 3. How can you succeed in pursuing your dream job?
- 4. Do you think it is possible to reach your dream job? Why (not)?
